The TRANSPARENT GUARANTEE

LUCID IN EVERYTHING WE DO

Lucidity is our driving value. We believe that if we foster transparency in everything we do, we will provide outstanding products, educate the public, improve the health of the masses, change laws, and help others 'Experience Life Again'.

Chase Hudson

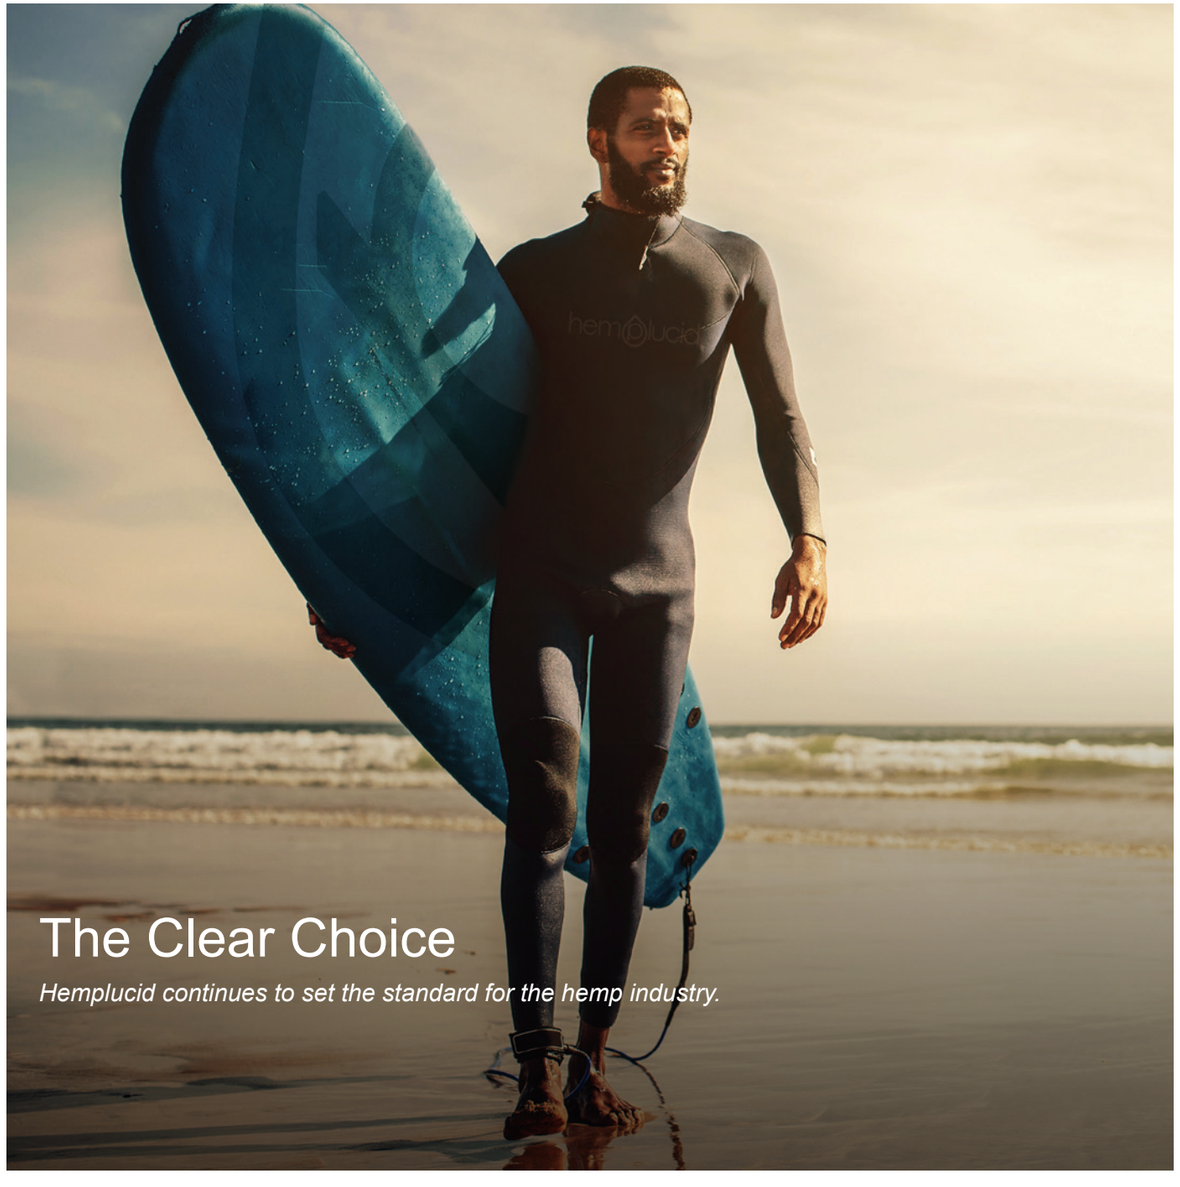
Chase Hudson, CEO

The products contained in this booklet are produced using only legal hemp grown in accordance with government regulations of the USA.

Whole-Plant CBD products in this booklet contain trace levels of THC <.3% THC. This is the legal limit of THC that is produced in the hemp plant.

*The statements contained in this booklet have not been evaluated by the Food and Drug Administration. These products are not intended to diagnose, treat, cure or prevent any disease.

Products shown in this booklet should be used only as directed on the label. They should not be used if you are pregnant or nursing. Consult with a physician before use if you have a serious medical condition or use prescription medications. A Doctor's advice should be sought before using this or any supplemental dietary product.



THE DIFFERENCE

Genetically Superior - After nearly a decade of scrupulous selective breeding, we have developed a strain with robust cannabinoid content.

Whole-Plant™ CBD- Hemplucid utilizes the whole hemp plant, keeping intact the rich terpenes, secondary cannabinoids, and fatty acids, to interact with and enhance the properties of our products.

CBD-Rich Products- Higher CBD concentrations allow for more pristine initial extraction, enhancing potency and efficacy.

Secondary Cannabinoids - These naturally occurring compounds address specific deficiencies and imbalances in the body's neurochemistry.

Terpene Rich - These health-promoting organic compounds are found throughout nature, in both plants and animals. Hemplucid utilizes soft extraction methods, which leave flavorful terpene profiles intact.

<0.3% THC - We use the legal limits of THC to stimulate the body's endocannabinoid system. This increases the absorption of other cannabinoids without causing psychoactive effects.

Synergistic Effect - Cannabinoids, terpenes, fatty acids, and other phytonutrients all interact and collectively enhance the therapeutic properties of CBD.

Quality Ingredients: - We carefully select our ingredients and have strict quality control standards. Our source materials are pesticide-free, contain no trans fats or artificial additives, and are always third party tested.

Nothing Artificial- Hemplucid takes a simple approach to ingredients. We have no use or need for anything artificial. Our products are exactly as nature intended.

No psychoactive effects - Our source hemp only contains trace levels of THC, so the "high" typically associated with marijuana is not possible to achieve using our extracts.

50 State Legal - CBD currently enjoys 50 state legality, with hemp-friendly circuit court rulings and legislation offering sufficient legal precedent for the industry to continue booming.

Safe Extraction - Super-critical CO2 is an extraction method that is free of solvents, resulting in higher quality oils, and leaving terpene profiles intact and full of flavor.

Nano Technology - Nano nutrients within our products promote rapid metabolism. Due to their tiny size, these nutrients travel quickly and effectively to the bloodstream, rapidly absorbing into the cells.

Multi-Step Bonding- Some of our CBD is bonded to organic vegetable glycerin, accentuating the natural smell and taste of our products.

U.S.A. Product - Each step of Hemplucid's manufacturing occurs in the United States.

PRODUCT
GUARANTEED

PASSED DOWN THROUGH THE GENERATIONS.

Hemp is one of the earliest domesticated plants known and has been cultivated for generations. It is one of the most nutritious foods on the planet. Hemp was first grown in ancient China and India. In far eastern China, hemp was celebrated as one of the seven main grains and has been popularly used in a variety of medical recipes throughout time.

The biochemical profile of the hemp plant contains compounds like terpenes, amino acids, proteins, sugars, enzymes, fatty acids, flavonoids, and more. All Hemplucid products contain these desirable compounds at various percentages. The human encodannabinoid system (ECS) includes cell receptors spread throughout the body, and these receptors dynamically interact with the chemicals found in the cannabis plant family.

A healthy ECS promotes metabolic homeostasis in the body, especially over time. Inversely, there are a host of common health conditions that are linked to endocannabinoid deficiency. The hemp plant contains a wide spectrum of valuable nutrients and amino acids which interact with the ECS and improve general well-being.

While cannabidiol (CBD) does have impressive values with no psychoactive effects, CBD is lacking when it is used as a 'stand-alone' treatment. In order to unlock the full potential of CBD, it must be allowed to work in synergy with other cannabinoids, terpenoids, and flavonoids found within the hemp plant.

Please examine the below list of 15 known cannabinoids and terpenes found in Hemplucid for a quick overview of their potential benefits. More clinical study is needed in order to fully understand the complexity of the hemp plant.

CANNABINOIDS

Cannabidiol (CBD)- *Supports a healthy immune system, and stabilized neurological health.

Cannabidivarin (CBDV) - *Shows promise for use in the management of spasms and convulsions.

Cannabigerol (CBG) - *Inhibits the uptake of GABA, which can help to decrease anxiety and muscle tension.

Cannabichromene (CBC) - *CBC along with cannabidiol and tetrahydrocannabinol may have antidepressant effects. Studies show CBC helps promote neurogenesis.

Cannabinol (CBN) - *Is said to promote sleep, stimulate appetite and bone growth. CBN provides anti-inflammatory and analgesic effects.

Cannabidivarin (CBDA) - *May reduce inflammation throughout the body.

Tetrahydrocannabinol (THC) - *Trace-THC stimulates cell receptors, enhancing the value and increasing the absorption of other synergistic cannabinoids.

TERPENES

Myrcene - *Suggested to lend relaxation and mood relief to the user.

Bisabolol - *Recently becoming the subject of research for the medical benefits it displays in cannabis.

B-caryophyllene - *Produces anti-inflammatory and analgesic effects. B-caryophyllene is found in plants throughout nature.

Humulene - *Acts as an appetite suppressant and exhibits potent anti-inflammatory activity.

Guaiol - *Research says it kills microorganisms or stops their growth.

Linalool - *May be an effective anxiety and stress reliever.

Isopulegol - *Possess gastroprotective and anti-inflammatory effects.

Borneol - *Beneficial for combating fatigue and recovering from stress or illness.

Selecting the Right Product

It's important to find the CBD product that works best for you.

FOUR ROUTES OF DELIVERY

Oral - When taking Hemplucid products orally (Gummies or Capsules) it takes over an hour for the consumed cannabinoids to start arriving in the bloodstream.

Inhalation -This method produces rapid effects. Vaporized CBD droplets in the lungs are quickly absorbed into the bloodstream and are directed to the brain rather than the liver, as they would be in the case of digestive absorption.

Sublingual - The sublingual method of administering several drops under the tongue is relatively fast-acting and effective.

Topical - Active ingredients are absorbed into the bloodstream through the skin from an externally applied cream. Topicals are used for localized effects (e.g., to treat local inflammation, pain or skin conditions) rather than for the delivery into systemic blood circulation.

HOW TO START USING CBD

Start Small - Start with the smallest dose possible. Everyone reacts differently to various supplements. As with any new product, it is important to become familiar with how your body responds before increasing the dose.

Size Matters - Larger individuals may prefer a higher dose of CBD than smaller people. With CBD, you can easily scale up just a few milligrams at a time to meet your personal needs.

Consult a Medical Professional - If you have a medical condition, consult with a health care professional before using CBD.

Consistency is Key - When you use CBD you might need to use it during a longer period of time for the effects to occur. Consistency stimulates a healthy, functioning endocannabinoid system. As cannabinoids enter the system, your body becomes more sensitive over time, and you will start experiencing better effects.

DOSAGE GUIDELINES

GENERAL HEALTH:
2.5-15mg

ANXIETY AND STRESS:
15-35mg

CHRONIC PAIN:
35-50+mg

Water Soluble CBD

Fast-acting and effective, this is our most popular product.

Hemplucid Water Soluble, Whole-Plant™ CBD

Hemp Nutrition

Hemplucid's Water Soluble is developed with nano technology that provides exceptionally high bioavailability and therapeutic effects. Water Soluble CBD is absorbed rapidly and completely by the body. This means higher potency and faster onset of action. Additionally, our Water Soluble CBD is water-compatible and can be easily mixed into beverages.

CBD in MCT Oil

MCT Oil with CBD is a winning combination!

Hemplucid Whole-Plant™ CBD in MCT Oil

Hemp Nutrition

Whole-plant CBD is paired with delicious MCT oil, with its own health-promoting vitamins, minerals, and healthy fats. MCT's are readily absorbed by the GI tract and are metabolized easily by the liver, where they are reported to encourage the use of fat for energy. Hemplucid CBD elevates MCT, taking the health-promoting properties of both oils to the next level.

Hemplucid Whole-Plant™ CBD Vape / Drip

Hemp Nutrition

Hemplucid Vape / Drip enters your lungs and diffuses directly into your bloodstream rather than passing through your gut and liver. Because vaporized CBD particles bypass the digestive system, the bioavailability is increased and the effects tend to work more quickly than other products.

With robust cannabinoid content, our rich and efficacious Vape / Drip line outshines the competition. The unique smell and mild taste will surprise you!

CBD in Hemp Seed Oil

Nutritious hemp seed oil blended with natural, therapeutic CBD.

Hemplucid Whole-Plant™ in Hemp Seed Oil

Hemp Nutrition

Hemplucid's Whole-Plant™ CBD is combined with hemp seed oil giving it the characteristic hemp aroma and taste. The flavor is stronger than other oils, so you may consider mixing it in a smoothie or soup. Hemp Seed oil contains a desirable 3:1 ratio of Omega 6 to Omega 3 essential fatty acids which is the recommended balance ratio for humans. Hemp seed oil also has other minerals such as potassium, magnesium, iron, zinc, and calcium.

Body Cream

Topical CBD can provide targeted relief for soreness.

NEW PACKAGING COMING SOON

Hemplucid Whole-Plant™ CBD Body Cream

A cannabinoid-rich rub is a perfect way to wind down from a brutal workout or hike. For intense localized pain, you may try a stronger dose. Sweet-smelling Hemplucid body cream leaves your skin feeling refreshed and clean, with no oily residue.

Hemplucid Whole-Plant™ CBDA Body Cream

CBDA has different characteristics and properties than CBD. While there has been little research done on this form of the cannabinoid, it is already known to have unique benefits. CBDA is thought to be an anti-inflammatory, anti-nausea, antioxidant, and antibacterial.

30 Bears *5 Bears*

Hemplucid Whole-Plant™ CBD Gummy Bears

Hemp Nutrition

Hemplucid Whole-Plant™ CBD Gummies deliver a carefully pre-measured 25mg dose of cannabidiol right into your Endocannabinoid System (ECS). After ingestion, CBD interacts with ECS receptors in the brain, nervous system, and immune system. The ECS has a far reach, playing a part in body process that affect pain management, anxiety, depression, inflammation, sleep, and appetite.

Dab Wax

Hemplucid Dab Wax delivers powerful CBD effects, quickly!

NEW AND IMPROVED

Hemplucid Whole-Plant™ DAB Wax

Hemp Nutrition

Hemplucid Whole-Plant™ CBD Dab Wax contains 200mg of ultra-refined CBD concentrate. We use a solvent-free supercritical CO2 extraction process that yields a golden yellow CBD wax that is rich in terpenes. The result is an amazingly effective product that is fast-acting and vastly more potent than the isolated CBD extracts you'll find elsewhere.

SCAN CODE
Use the lot number found on any Hemplucid product to get product testing, manufacturing, cannabinoid content, and additional information.

Ingredients: Whole-Plant Hemp CBD

Suggested Use: Use as needed. This product is designed for vape pens, wax chambers, and dab nails. Store at or below 80f. Dab Wax is not edible.

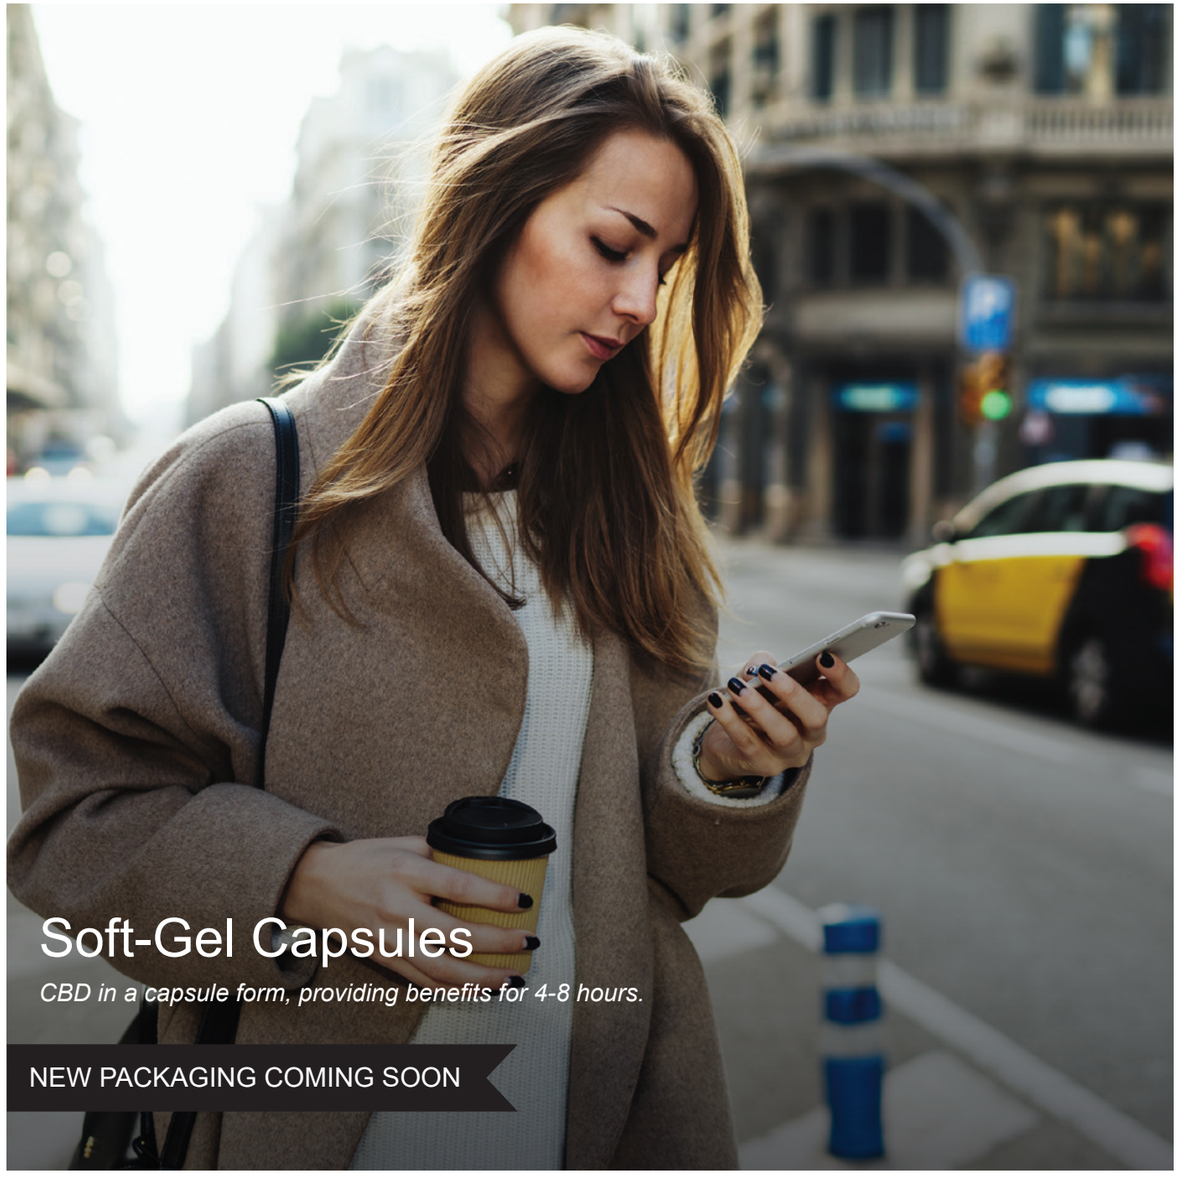
Route of Delivery: Inhalation
Delivery Speed: Immediate
CBD Base: Whole-Plant
Taste: Natural Hemp
Strength: 200mg
Servings: 15-20

Hemplucid CBD Dab Wax is good for use with an oil rig but can also be used with other methods.

When looking to use a vape pen, be sure to do your research to find one that works well for dabbing (you'll need one with a separate atomizer and cartridge). Your vaping pen has the following parts:

- Atomizer
- Cartridge
- Battery
- Mouthpiece

Vaping dabs is easy. Take your vape pen and disconnect the atomizer from the battery. Take the atomizer and place a small dab on the coil. Turn on the battery chamber, then connect the atomizer to the battery. Connect the mouthpiece and you're ready to take a dab hit. Draw in slowly to make sure you get the necessary amount of heat. This is potentially a cleaner way to smoke dabs.



Soft-Gel Capsules

CBD in a capsule form, providing benefits for 4-8 hours.

NEW PACKAGING COMING SOON

Hemplucid Whole-Plant™ CBD Soft-Gel Capsules

Hemp Nutrition

Get the benefits of Hemplucid's Whole-Plant™ CBD without the hempy after taste in an easy to swallow form. Hemplucid's Whole-Plant™ CBD Soft-Gel Capsules are a convenient way to dose CBD throughout the day, and experience the valuable healing that comes from our unique formulation.

NATURAL HEMP PRODUCTS

ShenHemp - Natural Hemp

Hemp products for nutrition and balance.

ShenHemp Hemp Hearts

by Hemplucid

Hemp seeds are nutty and sweet like pine nuts but offer a high amount of omega-3, 6 and 9 fatty acids necessary for muscle and joint repair. They also have all the essential amino acids in an easily digestible form. Three tablespoons (10g) of hemp hearts contain ten grams of protein which is readily absorbed and utilized by the human body.

ShenHemp Hemp Hearts are an easy, delicious way to enhance your nutrition.
